Attached are two sections of a map which I hope will be good enough for you to determine whether Anheuser Busch owns "Segment F" of Dead Creek, shown with a marsh stipple between two railroads on the map.

If you do own the land, I can send you some materials about the status of the proposed Superfund Site of which this is the tail end.

U.S. EPA and IEPA hope to do a field check (a walk-through with possible sampling of surface water, sediments or plants) in April (not the first week) to assess the impact or non-impact of contaminants from upstream.
